

**SECTION II -  
CRIME INDEX OFFENSE/  
CRIME RATE DATA**

---

---

---

## Crime Index Offense /Crime Index Offense Arrest Data

---

---

This section presents crime index offenses, crime index offense arrests, drug crime arrests, and supplemental data offenses reported to police. The I-UCR crime index offenses and arrests include the categories of murder, criminal sexual assault, robbery, aggravated assault/battery (including attempted murder and ritual mutilation), burglary, theft (including burglary from a motor vehicle), motor vehicle theft and arson. The drug crime arrest section includes violations of the Cannabis Control Act, Controlled Substances Act, Hypodermic Syringes and Needles Act, and Drug Paraphernalia Act. The supplemental data section includes the offenses of crimes against school personnel, crimes against children, domestic crimes, and hate crimes categories. Due to the volume of data reported, only state and county totals are published for the crime index offense arrest, drug crime arrest, and supplemental data categories.

Caution should be exercised when reviewing and using this information. Many social factors related to crime and a community's population must be considered when making statistical comparisons. For example, a community may have a small residential population but a large transient population because of a substantial number of employers, motels, entertainment attractions, etc., within its jurisdiction. A large transient population increases the potential for criminal behavior within a small jurisdiction. The population-based crime rate calculation does not compensate for a transient population, and the statistics can make it appear that crime is more prevalent than reality would indicate.

The law enforcement employee information totals consist of sworn, civilian, and auxiliary personnel who were employed by sheriffs' offices, police departments (including those that report data directly and indirectly to the I-UCR Program), colleges, and universities as of October 31, 2002 (see page 215 for law enforcement employee definitions).

Each county total reflects crime data reported by police departments, sheriffs' offices, colleges, and universities that are located within each county. Since the Secretary of State's Office has districts that are statewide, the Secretary of State's Office totals are not reflected in the county total but are reflected in the state total. Data reported from non-traditional jurisdictions, such as hospitals, airports, etc., may have been previously reported by another reporting agency and are excluded from the state and county totals.

The Crime Index Offense/Crime Index Offense Arrest/Crime Rate Comparison State Total is an aggregate total of the sheriffs' offices, police departments, colleges, universities, and the Secretary of State's Office.

The footnotes in Section II are defined as follows:

- **1 - "One or More Months Missing"** indicates that an agency reports directly to I-UCR, but that one or more monthly UCR reports were delinquent for that reporting year.
- **2 - "Agency in Non-Compliance"** indicates that the agency has reported UCR data in the past, but did not provide UCR reports at all during the reporting year.
- **3 - "Reported Through Other Agency"** indicates that the agency reported their UCR data through another law enforcement agency during the reporting year.
- **4 - "Partial Year Reporting"** indicates that a) either a law enforcement agency started direct reporting to I-UCR some time during the reporting year; or b) a law enforcement agency ceased to exist or lost its officers some time during the year, and UCR reporting was terminated.

## Crime Index Offense /Crime Index Offense Arrest Data

This section used the most recent complete census population statistics available from the U.S. Bureau of the Census. The 2001 and 2002 crime rates were calculated using the 2000 U.S. Bureau of the Census actual census figures. Variations from the 2000 actual census figures are a result of a special census or corrections received from the U.S. Bureau of the Census or from the reporting agency.

Since a sheriff's office population is calculated by subtracting the I-UCR reporting agencies' population from the county population total, multi-county jurisdictions may impact a sheriff's office crime rate. Therefore, unless otherwise noted, the I-UCR Program has proportioned each of the multi-county jurisdictions' crime rate, crime index total, and each of the eight crime index offenses based on the percentage of the population residing in each county. In some cases, the percentages may not equal 100 due to rounding. There were 62 cities with I-UCR reporting jurisdictions located in more than one county (see appendix pages 237-249 for a list of cities and counties).

**Example:**

A city with a population of 100,000 has 75,000 or 75.0 percent of its population in County 1 and 25,000 or 25.0 percent of its population in County 2. The total crime index offenses reported by the agency in 2002 is 2,500.

The crime index has been computed as follows for County 1 and County 2:

<b>Jurisdiction</b>	<b>County</b>	<b>Population</b>	<b>Calculation</b>	<b>Total Crime Index</b>
City	County 1	75,000	.750 x 2,500 =	1,875
City	County 2	25,000	.250 x 2,500 =	625
	Total	100,000	Total	2,500

### State Total Crime Index Offense Rate Comparison 2002/2001
