

What is Nlets and What Information Do We Provide?

Michelle Kiefer
eLearning Training Associate

A perspective view of a server room aisle. The racks on both sides are filled with glowing blue and green lights, suggesting active servers. The floor is dark with some light trails. The ceiling has recessed lighting. The overall atmosphere is high-tech and digital.

Nlets Quick Overview

We were founded May of
1966 as LETS – Law
Enforcement
Telecommunication System.

Years later we became NLETS
- the National Law
Enforcement
Telecommunication System.

Now we are known as The
International Justice & Public
Safety Network, but we are
still called Nlets.

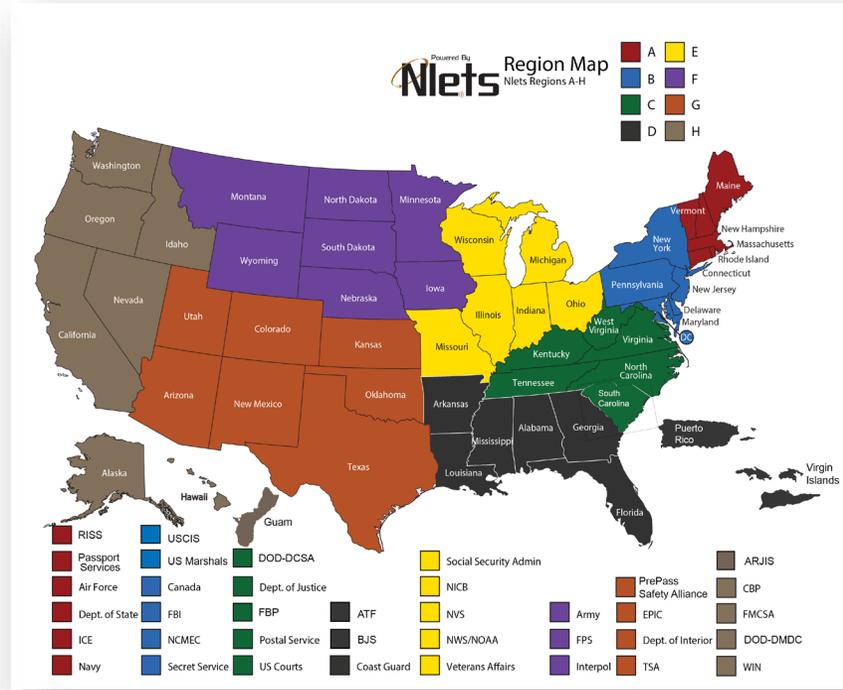

We connect all 50 states, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, and Canada along with numerous federal agencies and various associate members.

We are responsible for the secure exchange of criminal justice data necessary to complete our law enforcement, justice, and public safety mission.

Board of Directors

Nlets Reps

8 Regions

Officers

**Nlets and NCIC
Partners, But Not the Same!**

What is NCIC?

- ✓ **Centralized information system** that facilitates the flow of criminal justice information between federal, state, local law enforcement, and other agencies. The data is used for law enforcement/criminal justice.
- ✓ **NCIC houses Hot Files**
- ✓ Governmental in nature!

Think of NCIC as
your access to
nationwide data!

What is Nlets

- ✓ Self-funded, private, not-for-profit corporation.
- ✓ Funded and governed by state law enforcement agencies, the principal customers of Nlets.
- ✓ Securely exchanges data for information sharing.
- ✓ **Nlets does NOT store** data.
- ✓ Not governmental in nature.
- ✓ Not a vendor, although we work with our industry partners.

Think of Nlets as
your access to state
data!

But that's not all!

How Nlets Works

How Nlets Works

- Traffic violation
- Driver from out of state
- Query sent to Nlets

- Nlets receives query
- Validates query
- Sends to destination State

- Destination State receives query
- Electronically gathers requested information
- Sends response to Nlets

- Nlets receives response
- Forwards information back to requestor

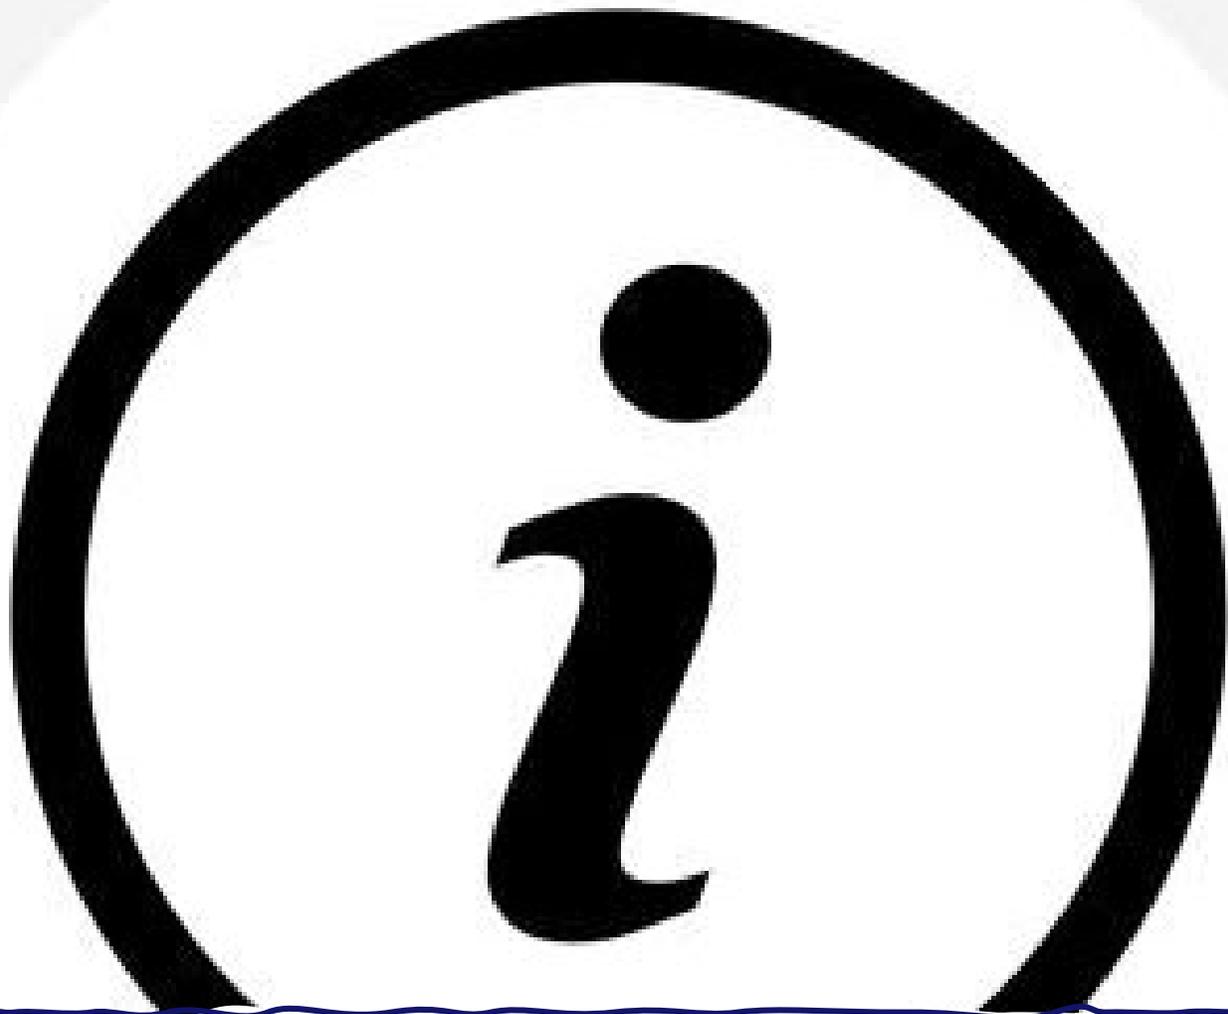

Amazing Statistics!!

- Average Roadside Response Time- 1.5 *seconds*
- Total Transactions – over 4 *billion* annually!
- Network Uptime- 100%
- System Uptime- 99.981%

Amazing, Why?

Company of 53 employees
with nearly ***half our staff***
directly responsible for
keeping our system
operational 24/7/365!

“Standard” Data Resources Available via Nlets

Things you
are likely
familiar with
already.

Driver License Queries

- Driver License by Name
- Driver History

Vehicle Registration Queries

- Vehicle Registration by Name

Administrative Messages

- Hit Confirmation

Criminal History Queries

Most Used Nlets Message Keys

- **DQ** – Driver's License Query
- **RQ** – Vehicle Registration Query
- **IPQ** – INTERPOL Wanted Person Query
- **IQ** – Identity Query
- **CR** – Criminal History Response

Least Used Nlets Message Keys

- DEX/DEA, DUX/DUA, DRX/DRR – NDPIX
 - Illinois - No
- FVQ (Vehicle), FTQ (Travel Doc) – INTERPOL
 - Illinois - Yes
- PPQ/PPR, PBQ/PBR, PCQ/PCR, PAQ/PAR, CPQ/CPR – Parole, Probation, and Corrections
 - Illinois - No
- GPQ – LEISS (Law Enforcement Information Sharing Service)
 - Illinois - No

Why Are These the Least Used Message Keys?

- The State / Agency ***may not support*** the MKE
- The State / Agency ***vendor may not support*** the MKE
- Your ***ORI does not have permission*** to run these MKEs
- Your State / Agency has ***not determined there is value*** in them....yet!

Ways to Utilize the Nlets Network

Driver License Information with Photos!

Why is Having Access To These Photos Important?

Pulse Nightclub Shooting, Orlando, FL
June 12, 2016

The shooting took place at night in an area where you would expect that the vehicles parked nearby belonged to the people in the nightclub.

The afternoon of the next day, there were still a lot of vehicles that had not moved since the night before.

Law enforcement felt this could be a good lead to follow.

They felt it was likely that the vehicles were driven there by people who were either deceased inside the venue or transported for medical assistance but could not be identified.

The out of state vehicle's tags were run through Nlets to get registrant information.

FDLE ran the out of state registrant information through Nlets DQ and provided printouts of DL photos with identifying information to agents at the scene.

Out of state license

Administrative Messages

Overview

Administrative Messages are criminal justice related point-to-point free form messages that are used for any information transmission ***not*** associated with a specific message type.

AM is an Nlets MKE.

BOLO's

- Description of vehicle
- Direction of travel
- Description of driver
- Description of victim(s)
- Any other notable identifiers

Administrative Message

AM with Image (AMI) Success Story

Provided by: Iowa Department of Public Safety

- Armed bank robbery occurred in Mercer County, Missouri.
- Sent AMI with suspect and vehicle details and attached an image of the suspect.
- Within 2 hours Iowa State Patrol had the vehicle stopped and the suspect positively identified based on the image attached to the AMI.

Targeted Interstate Photo Sharing

Extends image capability to include the transmission of wanted persons, missing children, vehicles, identifying scars, marks, and tattoos, and other critical images.

A close-up photograph of a black wooden gavel with a gold-colored band around its head, resting on the keyboard of a laptop. The background is blurred, showing a window with light coming through. The text "Criminal History Identity Query" is overlaid on a white banner at the bottom of the image.

Criminal History Identity Query

Used to retrieve
criminal history
records that are not
presently available on
NCIC's III System

**Ours should be used
as a secondary
inquiry and should
never substitute for
the III inquiry!**

Helpful to investigations
if you receive a 'no
record' from III OR
receive a record but feel
there may be more
information available
within a state file.

**Canadian criminal
history records are also
available via Nlets!**

Do You Know About Destination NL and Z1?

NL – Consolidated Response

- State Warrant
- Wildlife Violation & License
- Sex Offender
- Driver License
- Vehicle Registration
- Criminal History Identity

NL – Consolidated Response

- Sent only to participating states
- Builds summary information
- Filters out no hits
- **One Response!**

Z1 Destination

- Driver License
- Vehicle Registration
- Boat Registration
- Parole, Probation, and Corrections Information

Z1 Destination

NJIN replicates the original query and sends it to each of the 53 destinations in the Z1 list.

Separate responses

What destinations are on that list?

Those destinations are:

All states, commonwealths, and Puerto Rico

Diplomatic / Ambassador plates

(Department of State – Registration and Driver Data)

Government owned vehicles that are not Diplomatic / Ambassador

(General Services Administration – Registration only)

We Offer So Much More!

A large part of what our network is used for is ***driver/vehicle information, Administrative Messages and criminal history information***; however, there is so much more available to you!

Concealed Weapon Permit Information

Allows for the exchange of concealed weapons permit information between state, local, and federal law enforcement and criminal justice agencies.

Scenario

A detective was assigned to investigate the ***violation of a domestic violence restraining order*** where the victim claimed her estranged boyfriend drove by her house and ***pointed a handgun at her to scare*** her from testifying against him at an upcoming court hearing.

The suspect claimed he did not own or have access to a firearm and had no familiarity with them. He said he was merely driving by her house to make sure she was okay.

A CWQ was run - the ***suspect had a permit to carry a firearm*** in a neighboring state where he was now living, which undermined his earlier statement and his credibility.

The suspect was subsequently found in contempt and ***convicted of aggravated assault.***

Wildlife Violation & License Information

Provides a standardized, secure, and efficient method for Nlets users to ***exchange wildlife violator and license information.***

Success Story

Provided By: *Montana Department of Justice*

- Subject approached three girls outside a library in Wyoming.
- Asked for help looking for his missing puppy.
- One girl offered to help, but when she changed her mind, the man pointed a gun at her and made her get into his **white SUV**.
- The 10-year-old girl's friends reported the incident to police.

Success Story

- Tied her hands behind her back with yellow rope.
- Hit her in the back of the head with a gun.
- He assaulted her after putting a cloth bag over her head.
- The man later pulled off a road in Yellowstone National Park.
- He removed the ropes and released her, where she was later found on a mountain road by hunters.
- The girl provided police a detailed description of her abductor and his vehicle, **a white SUV**.

- Video surveillance in Yellowstone National Park captured the **vehicle's license plate**, linking it to the suspect, Jesse Speer.
- Check of Montana DMV resulted in **outdated information**.
- A check of the Fish, Wildlife, & Parks automated license system (ALS) produced a hit, which **provided current address information** – led to the safe arrest of the suspect.
- Suspect was convicted of four felonies and sentenced to life in prison plus 30 to 50 years.

Mobile Device Query

IMEI

(International Mobile Equipment Identity)

A 14-digit number that serves as a distinct identifier for the device assigned by the manufacturer, which is guaranteed to be globally unique.

You can think of it as a phone's social security number.

A hand is shown holding a mobile phone. The phone's screen displays the text "IMEI(MEID) and S/N" at the top. Below this text, the IMEI number "35625207041" is visible. Two barcode images are shown on the screen, one above the other. At the bottom of the screen, there is a button labeled "OK".

IMEI(MEID) and S/N

IMEI

35625207041

S/N

OK

The **Mobile Device Query** leverages the Recipero National Mobile Property Register (NMPR) search, which returns ***status*** and ***history information*** about a mobile device based on its IMEI number.

Source

Information is collected from multiple authoritative sources.

Billions of records from multiple countries, U.S. law enforcement agencies, insurance companies, and more!

The response will include status and historical information about the device based on the Recipero NMPR system.

Additionally, Recipero logs each query, so future queries on the same IMEI will show all prior searches.

Scenario

Police were investigating a crime scene where several suspects admitted to being students at a local college.

They were charged with distributing narcotics to other students on campus.

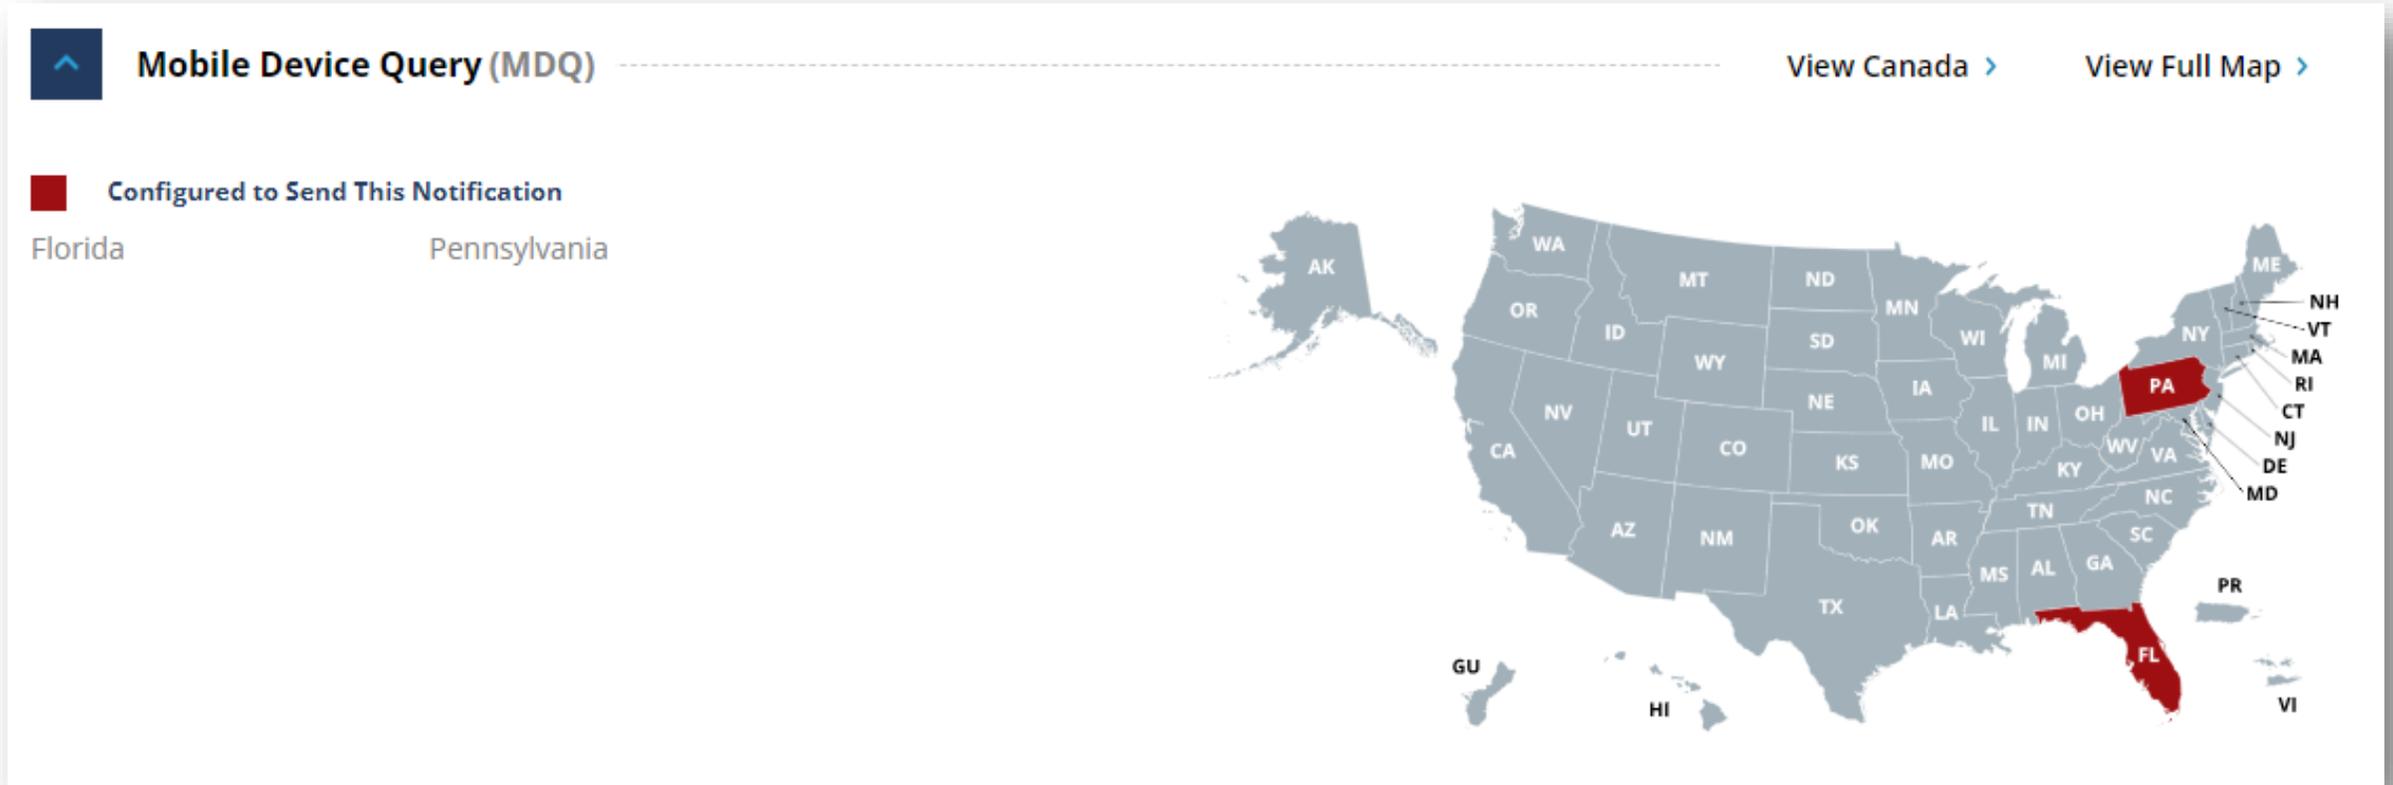

During the investigation, police discovered multiple high-end cell phones.

Suspecting the phones might be involved in illegal activity, the investigating officer wanted to check to see if the phones were stolen or had a history of inquiry from other jurisdictions, so he gathered the IMEI numbers from the phones and sent an MDQ messages to Nlets.

The responses revealed the phones were all recently reported stolen from a local retailer, allowing investigators to link the suspects to the theft and add robbery to their charges.

Mobile Device Query

Immigration Alien Transaction

Provides timely information on aliens suspected of criminal activity and status information of aliens under arrest.

This transaction searches multiple databases including NCIC and Triple I with a response being manually returned to the requesting law enforcement agency by the LESC.

Response times will vary depending on the return of the individual state criminal histories and the extensiveness of the query.

Sex Offender Registration Transactions (SOQ/SOR & SON)

An agency may request out-of-state Sex Offender Registration records by using a Sex Offender Registration Query (SOQ). The SOQ message type will interrogate the destination state database and return with information on the subject or a notification of "no record" (SOR).

The Sex Offender Registration Notification (SON) serves as a formal method for an agency to communicate with another agency regarding the relocation of a sex offender.

This section provides an overview and details regarding the Sex Offender Registration Query (SOQ) and the corresponding Sex Offender Registration Response (SOR).

Multi-State Query Functionality

Nlets Informational Maps

The screenshot shows the top navigation bar of the Nlets website. The 'Resources' link is circled in blue. Below it, a dropdown menu is open, with the 'Maps' section highlighted by a brown hand-drawn box. The 'Maps' section lists three items: 'Initiative Maps', 'Message Key Maps', and 'Representative Maps'. To the left of the 'Maps' section is a list of other resources: 'Brodie Assistance Fund', 'Blog', 'N-Gage', and 'Wiki'. To the right of the 'Maps' section is a large image of a city skyline at night with a network overlay of white lines and dots.

An iceberg is shown floating in a deep blue ocean under a clear sky with scattered white clouds. The iceberg's tip is above the water line, while the vast majority of its mass is hidden beneath the surface. The water is a deep, clear blue, and the sky is a lighter blue with soft, white clouds. The overall scene is serene and emphasizes the hidden depth of the iceberg.

This is just the tip of the iceberg!
Nlets offers so much more!!

Importance of Sharing with Agency Personnel

To assist your sworn personnel with their cases, share the various types of Nlets data that is available to them.

Letting them know about the information available through Nlets will assist them in knowing what to ask dispatch and crime analysts to query.
